Auto extra charges are the cost per amount of extra visitors over the allotted plan, combine the plan amount with per visitors over. For example, if a 10K essential plan gets 18,500 visitors in one month they will pay \$29 + \$30 ((\$10 per 3,000 visitors) X 3) for the extra 8,500 visitors that month.

To avoid auto-extras, simply upgrade your plan, if you have questions reach out to our Partner team for support.
